

Solutions for Renewable Projects

< OUR COMPANY

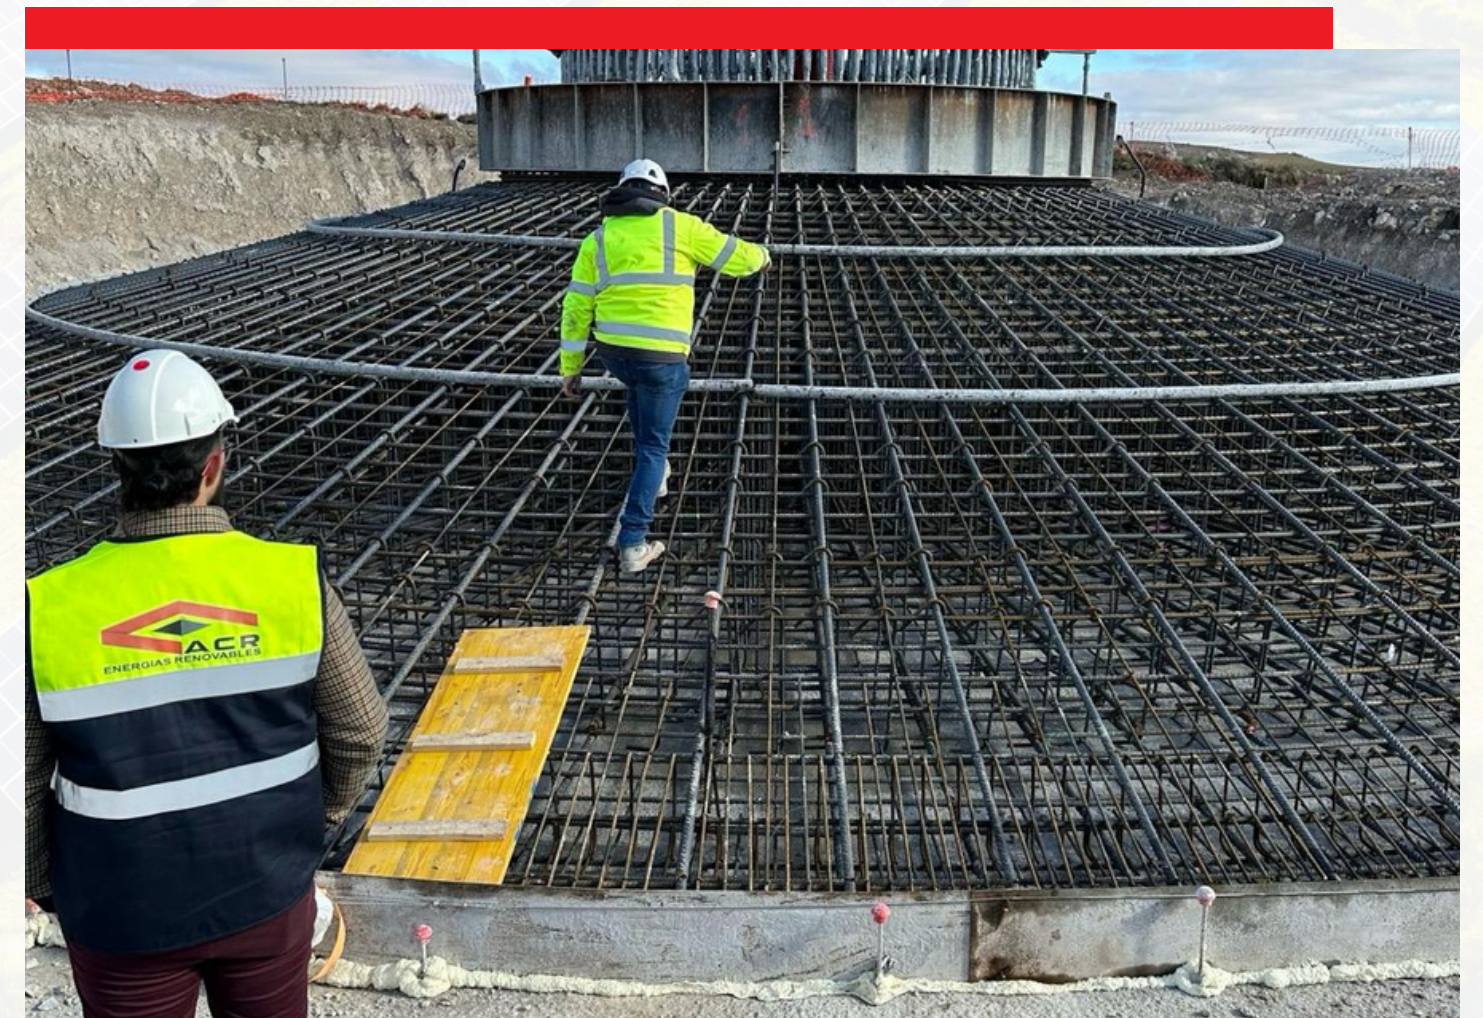

ACR's main activities are the development, implementation and management of electricity production projects from renewable sources. Convert, through advanced technological processes, the energetic potential of wind, tides, watercourses, the sun or even from the organic by-products of the various human and agricultural activities in energy electric, to be injected into the network for domestic consumption and industrial.

Promote the development of projects for energy production from sources renewables, as well as developing clean hijacking technologies fossil carbon and obtaining products from added value.

Commitment to the creation of solid partnerships at the nationally as well as internationally, consolidating partnerships in new markets international.

 **OUR MISSION**

OUR SERVICES

- General work on photovoltaic and wind power plants.
- General assembly of Tracker's e and fixed tables from different brands of the current.

In addition to

- Foundations
- Construction
- Electrical Connections
- Construction of low Voltage Networks
- Ditches
- Terrestrial Network
- Telecommunications Installation
- Installation of Wiring and Connections
- Civil Engineering Works in Photovoltaic Power Plants
- Inner Road Network
- Drainage works
- Access conditioning
- Solar module foundations
- Transformer Centers and Disconnectors

OUR ENTERPRISES

- Draco -Zamora ES | 50MWp – Solaria
- Torrijos -Toledo ES | 50MWp - Lantania
- Andorra -Teruel ES | 50MWp - OPDenergy
- Galve -Teruel ES | 37,8MWp - Copsa-OPDenergy
- Toro - Zamora ES | 50MWp – Secoex
- Cuenca – Castilla La Mancha ES | 50MWp – Iberdrola
- Projeto integrado UPPs Beja, Évora, Portalegre
- Estremoz – Alentejo Central PT | 5MWp – JDC
- Terena Portugal | 8MWp - Rosseti
- Monte Agosto Portugal | 11.8MWp - EXUS
- Cuenca Espanha | 50MWp - Copsa

On going:

- Viseu 5 / 1MWp
- Energycon Dade / 17 MWp - JDC
- Cruis / 16 MWp - EIFFAGE
- Almeirim / 7MWp - Proef
